

WOOD FRAMED UMBRELLAS

Thank you for your interest in Tropical J's Wood-Framed Umbrellas.

As of 2024, we have discontinued manufacturing wood-framed umbrellas and closed our wood shop due to the high cost of quality wood and repair challenges. While we no longer produce new wood frames, we may service and recover existing ones if they are in good condition. Please note that old covers are incompatible with our new frame style.

Looking forward, we made the decision so that we can introduce our Tropical J's Hybrid Umbrellas, featuring quality metal frames and our locally manufactured premium covers. These new covers, made with Sunbrella's 10-year warranty fabric and Gore-Tex thread, maintain our high standards while reducing costs and offering affordable service options, including on-site repairs.

For service or recovery of your Legacy Wood Umbrella, please use the "Request a Quote" feature on our website. Additionally, you can explore our new product line in the umbrella PDFs available for download.

Thank you for your continued loyalty.
